## Git va GitHub bilan ishlash

To'liq kurs videodarsligi: <https://youtu.be/GYmLXBlTqfE>

### — GIT

- **Git nima? - Version Control System (VCS) - Versiya Boshqarish Tizimi**

1. *index.html*
2. *new-index.html*
3. *new-rostan.index.html*
4. *new-vapshe-rostan.index.html*

- **Git afzalliklari:**

- kod versiyasini nazorat qilish;
- qanday o'zgarishlar kiritilganligi haqida ma'lumot beradi

- o'zgartirish kiritilgan kodga kim tomonidan va qachon va aynan qaysi vaqtda kiritilganligi haqida
- loyihalar bilan ishlashda individual yoki jamoaviy ishlash imkoniyatini yaratadi;
- git for marketing/product management/designers/custom support/human resources/...

### • **Git va GitHub farqi**

- Git - local - Version Control System
- GitHub - online - Version Control System Hosting Service (Xizmati)

### • **Git dasturini o'rnatish**

- Windows uchun — Git Bash
- MacOS uchun — Terminal, iTerm, Kitty

### • **Git ni sozlab olish (nastroyka qilish)**

- **git config ...** — git ni sozlab olish uchun ishlatiladigan buyruq
- **git config - -list** — barcha sozlamalarni ko'rsatish
- **git config user.name** — git foydalanuvchisining ismi
- **git config user.email** — git foydalanuvchisining emaili
- 🖐️ *Agar bularning hech qaysi biri sozlanmagan bo'lsa va endigina foydalanishni boshlagan bo'lsangiz. Unda uni sozlab olamiz.*
- **git config - -global user.name "username"**
- **git config - -global user.email "email"**

### • **Gitda yangi loyiha yaratish (Git repository)**

- repository - ombor/loyiha

- **git init** — yangi git loyihani boshlash uchun ishlatiladi. Faqat 1 marta ishlatiladi loyiha uchun.
- 
- **git status** — o'zgarishga uchragan holatni tekshirish uchun
- 
- **git add ...** — loyihadagi yangi fayllar, o'zgarishlar va o'chirilishlarni xotiraga olish uchun navbatda
- **git add faylnomi**
- **git add .**
- 
- **git commit ...** — navbatda turgan fayllarni butunlay saqlash uchun va xotiraga saqlanayotganda
- **git commit -m"xabaringiz"**
- 
- **git commit - -amend -m"xabaringiz"** — navbatsiz butunlay saqlash
- 
- **git log** — shu paytgacha berilgan commitlar tarixi/ro'yhati

### • **Fayl o'zgarishlarini bekor qilish**

- **git checkout - - faylnomi**
- **git checkout - - .**
- 
- **git checkout maxsuskod** — loyihamizning xohlagan versiyasida sayr qilishimiz mumkin
- **git checkout master** - ayni oxirgi ishlayotgan versiya

### • **Git add dagi navbatni bekor qilish**

- **git reset faylnomi**
- **git reset .**

- **Branch/Merge**

- [branch - filial](#)

- **Branch yaratish:**

- git branch — hozirgi mavjud branchlar ro'yhati
- git branch nom — yangi branch yaratish
- git checkout nom — berilgan branchga o'tish
- git merge branchnomi — berilgan branchni mavjud branchga yuklab olish

control panel > user accounts > credential manager > Windows  
credentials > Generic credentials

**Ijtimoiy tarmoqlarda:**
